Advanced F Prime Flight Software Workshop Agenda
Day 1 - Thursday, February 12th 2026, 8:30 am - 4:30 pm

Type	Topic/Activity	Presenter	Time	Duration
Introduction	00 Introduction	Jeff Levison	8:30	15
Presentation	01 Creating F Prime Projects Project structure Reusable libraries CI tooling	Kevin Ortega	8:45	45
Presentation	02 Advanced FPP Modeling State machines Subtopologies Custom analysis and code generation	Rob Bocchino	9:30	45
Break			10:15	15
Presentation	03 Design Patterns	Michael Starch Thomas Boyer-Chammard	10:30	90
Lunch			12:00	60
Exercise	Advanced Hands-On Tutorial Part 1 - choose one of four: Advanced Topology Development Through Communications Drivers Advanced Modeling Through State Machines Data Products Configuring F Prime for Small Scale Systems	Michael Starch Thomas Boyer-Chammard	1:00	210

Day 2 - Friday, February 13th, 2026, 8:30 am - 4:30 pm				
Type	**Topic/Activity**	**Presenter**	**Time**	**Duration**
Exercise	Advanced Hands-On Tutorial Part 2 - continuing with same tutorial as Day 1: Advanced Topology Development Through Communications Drivers Advanced Modeling Through State Machines Data Products Configuring F Prime for Small Scale Systems	Michael Starch Thomas Boyer-Chammard	8:30	210
Lunch			12:00	60
Presentation	04 Contributing to F Prime Governance Contribution process Ecosystem	Michael Starch	1:00	45
Presentation	05 F Prime Platforms Currently supported platforms Platform development Platform best practices	Kevin Ortega	1:45	30
Break			2:15	15
Presentation	06 Advanced Testing Rules-based unit-testing Reusable FIT testing CI/CD	Rob Bocchino Kevin Ortega	2:30	45
Presentation	07 Configuring F Prime Dictionaries Subtopologies Core types and platform types	Thomas Boyer-Chammard	3:15	30
Presentation	08 Secure Programming Security best practices Project security disposition Security reporting process	Steven Doran	3:45	30
Closing		Jeff Levison	4:15	15
